GREETINGS AND SALUTATIONS:-

Once again we offer a major portion of the Huie Collection - this time the Mexican Republican issues that he retained, plus many of the Philippine issues. These do present an extensive selection of the various Philippine countermarked dollars. We have made the effort to group two types of these countermarks which we feel cannot be genuine.

We are also offering the extensive reference collection of Mexican Paper Money which has been assembled by our Chicago numismatist, Mr. Ed Shlieker. There are notes that will delight the heart of any good "ragpicker". This presentation is evidence of our acknowledgement of the increased interest in banknotes of the world. The United States issues have long been popular, but now those of Latin America and of Europe are joining the parade.

Your attention is called to the Third New York International Numismatic Convention, which will be held on Friday, Saturday and Sunday, December 6, 7 and 8, 1974, at the Americana Hotel at Seventh Avenue and 52nd Street in New York City. There will be a Selected Bourse of 67 prominent dealers. On Thursday evening, December 5th, there will be a fine Myers/Adams auction of Ancient Coins. If you are interested and do not get their catalogs, do let us know. We will try to have one sent to you.

We ourselves will present a fine auction of Coins of the World on Friday evening and on Saturday afternoon. We expect to offer a thousand lots of coins and paper money and decorations and commemorative issues of one kind or another. We want to express our particular thanks to our colleagues, the Stack's, who delayed until the early part of the following week an auction that they had tentatively scheduled for the same dates as ours. We urge you to pay attention to their catalog also. They are justly noted for their many fine presentations.

Two new books recently published are now in our working library. The first is PHILIPPINE EMERGENCY AND GUERRILLA CURRENCY OF WORLD WAR II, by Neil Shafer. It is published by Whitman as No. 9370 at \$15.00. It is a monumental work deserving of your attention.

The second is from Spain and is titled LA MONEDA MEDIEVAL HISPANO CRISTIANA, by V. Ramón Benedito, F. Alvarez Burgos and V. Ramón Pérez. It is a photo-offset presentation of line drawings and typed copy for the listing of the various numismatic issues of the several areas of Medieval Spain. The cost is \$29.00. It can be gotten from the Club International Colon de Coleccionismo, Apodaca 20, Madrid 4, Spain - Attention Sr. Francisco J. Agustino de Miguel.

ALL THE BEST.

PHILIPPINE COUNTERMARKED COINS

After the independence of the several Spanish speaking countries was well established in the first quarter of the 19th century, the Spanish authorities in Manila decided to countermark many of the new silver coins being produced in order to validate them for use in the Philippines. There have been many articles written and much information placed on paper to enable many of us to form some idea of what has been and what exists. Among these many studies and references, particular attention is drawn to the following:

Aldo P. Basso - Coins, Medals and Tokens of the Philippines - pp 19-23

Pablo I. de Jesus - Philippine Numismatic Monograph No. 16, with a check list of hundreds of countermarked pieces, a number of which are offered here as part of the B. S. Huie collection.

Mena Crisologo - The Numismatist, July 1964, pp 891-895.

Paul Hoffman - Boletin No. 71 - The Apr-June issue by the Sociedad Numismatica de Mexico.

Craig - 39, 39a, 41, 42, 54.

Davenport - 440, 441, 442

There are many more references that can be cited. Many minor varieties exist of each type, so it is difficult to be sure that a given example is good or bad. However, the MANILA 1828 and MANILA 1830 c/m's must be applied to coins of or before those dates. Similarly, the Crowned F.7^o was used from 1832 to 1834. Later dated coins must be illegally c/m'd. The Crowned Y.II. was applied from 1834 until the early part of 1837. We must consider that later coins have c/m's falsely applied. We also may infer that when a given

c/m appears on many late date coins such c/m is false. By extension, even tho such a c/m appears on a piece within or before the proper dates, it still remains a false c/m. At the end of the regular listing, we offer ten such spurious items.

While Peruvian coins of the 1830's and coins from certain Mexican mints appear rather more often than other pieces, some issues are extremely rare. Spanish Colonial, European, Argentine and minor coins are particularly rare. The following coins are from the Huie collection with a few supplementary items added in order to give you a wider selection. Estimates are general. You must determine what you think a given piece, in its listed state of preservation, is worth to you.
